PROFILE

I build mobile and web products, with deep experience in React Native, real-time systems and the APIs behind them. I have shipped a ride-hailing platform (rider app, driver app, operations dashboard) to the App Store and Google Play, built a full savings-and-loans platform for a registered cooperative, and I am building my own bookkeeping product. I started as a graphic designer, so I care how a product feels as much as how it is built.

SKILLS

Mobile: React Native, Expo, Expo Router, EAS, NativeWind, Zustand, React Native Maps, Firebase Cloud Messaging, Agora, CallKeep

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HeroUI, shadcn/ui, TanStack Query, Framer Motion

Backend: Node.js, Express, NestJS, Socket.IO, REST APIs, OpenAPI / Swagger, JWT / Passport, BullMQ, cron jobs

Data: PostgreSQL, Prisma, MongoDB, Redis, MySQL, Firebase

Tools: Git & GitHub, Turborepo, Figma, Paystack, Cloudinary, Vercel, WordPress

EXPERIENCE

Frontend & Mobile Developer, Atom's Hub Technologies, Ibadan (client: Kero) June 2025 – August 2026

- Built Kero's rider and driver apps in React Native and Expo (Expo Router, NativeWind, Zustand), released on the App Store and Google Play.
- Delivered live trip tracking with React Native Maps, Google Places autocomplete and route directions, kept in sync over Socket.IO.
- Added in-app voice calls between riders and drivers with Agora, CallKeep and VoIP push, so calls ring natively without sharing phone numbers.
- Integrated Firebase Cloud Messaging push notifications, Google sign-in and Paystack card payments.
- Built the operations dashboard (React, Google Maps / Leaflet, Recharts), the public website and landing pages.
- Worked on the Node.js, Express and MongoDB real-time backend (Socket.IO with a Redis adapter, BullMQ queues).

Full-Stack Developer, Achievers Cooperative 2026

achieverscooperative.com.ng

- Built the cooperative's whole platform as a Turborepo monorepo: public website, installable member PWA (Next.js + Serwist), admin portal and API, used by its 30+ members.
- Designed a NestJS, Prisma and PostgreSQL API with modules for members, KYC, wallets, savings, loans, investments, weekly deductions, transactions, reports and audit.
- Built a receipt-upload and admin-approval flow so wallet balances change only after a payment is verified.
- Automated weekly contribution deductions with scheduled jobs, and generated the OpenAPI contract as shared TypeScript types for every app.

Graphic Designer & Digital Platform Support, Sacred Soulmates (remote) February 2026 – September 2026

- Designed flyers, social media carousels and video content, and supported day-to-day GoHighLevel platform operations.

SELECTED PROJECTS

Rekordly · Founder & Engineer · 2025 – present · rekordly.com

My own bookkeeping product for small businesses: income, sales, expenses, invoices, quotations, inventory, loans and profit reports in one dashboard. Next.js, TypeScript, HeroUI, Prisma, PostgreSQL, NextAuth (email, OTP, Google), Recharts. Planning v2 with a separate API, offline PWA and AI-assisted entry.

KwaraFind · Ilorin Hack4Dev hackathon · 2026 · kwarafind.vercel.app

Discovery platform for trusted local artisans in Ilorin: search by service and area, verified profiles, portfolios, reviews, service requests and direct WhatsApp contact, with a Paystack Pro plan. Next.js 16, Tailwind CSS 4, shadcn/ui, Prisma, NextAuth.

YourErrandGuy · Mobile app & admin · yourerrandsguy.com.ng

Food delivery, errands and laundry in one React Native and Expo app, with flows designed in Figma, a React admin dashboard and a lead-generation landing page.

ViraShare · Mobile app & admin · app.virashare.io

Task-and-rewards app where users earn points and redeem them for airtime or cash. React Native and Expo app plus a React admin panel for tasks, users and redemptions.

Websites · Web development

PayYourDues (dues-payment dashboard), Kunbis Unique Travels, Nemconsults and MM Charity Foundation (PHP, MySQL), Swim Safe YYC (WordPress).

EDUCATION

Postgraduate Diploma in Computer Science, University of Ilorin — In view, October 2026

Higher National Diploma in Computer Science, Adeseun Ogundoyin Polytechnic, Eruwa — November 2023

National Diploma in Computer Science, Adeseun Ogundoyin Polytechnic, Eruwa — April 2021
